Software that provides support, saves resources and cuts costs. A software that creates synergies and increases efficiency at the same time. A tool for organisation and structure. For storage, which informs and in which data and documents are not only searched for, but found! An application that helps avoid errors and ensures compliance with laws and regulations:

DIGITENCE 365

Based on Microsoft SharePoint online, **Digitence365** provides a multi-lingual software as a service business solution for all companies that already use Office 365 or intend to do so in the future.

Modular in structure, it summarises subject areas and provides needs-based support. Integrated functional elements enable effective and targeted work:

Service Management	Function Centre*	Security Management
Procurement Centre	Buying	Budget Management
Supply Chain Management	Inventory	Vendor Management
Sales Centre	Customer Centre	Sales Management
Support Centre	Ticketing	

* The Function Centre module is a prerequisite for the optional use of further modules, as it provides the technical basis. However, all other modules can be added as needed. A business solution that grows with the company! Of course, all functions of the Digitence 365 can also be purchased as a complete bundle.

In addition, a wide range of service options are available, which can also be taken up according to need and at fair prices.

Installation & configuration	Your Digitence 365 is set up in consultation (usually remotely) and individualised. Since this process is standardised, a flat rate usually applies here.
Chance & Adoption	We also support you with the many changes that arise from Office 365 and its new functionalities, their effects on the organisation and the processes. Whether on-site or remote, you determine the number of days required!
Trainings	We train your team in groups of 10 people in the functions of the Digitence 365 as needed. Remotely, at your premises or at ours.
Rollout	We accompany the introduction of Digitence 365 in the company, team, or department to the desired extent. Here we actively support your employees with advice and action.
Consulting (in presence)	You would like to use further functions of SharePoint Online and Office 365. Talk to us. We have the solution for you.
Data migration	Whether you want to migrate data from an existing system or transfer the data from SharePoint Online to a subsequent system. Our service guides you reliably.
Support	Our support offer is available in bronze, silver, and gold levels with different response times, depending on your needs.
Admin flat rate	In case you do not have qualified resources in the company, or the existing team is working to capacity! We take on this task for you.
