

Use your Microsoft **SharePoint online** or **Microsoft 365** in addition to the classic Office functions also our **business solution** for your

# Fleet management

collect and manage vehicle-specific data. Continuously check and document user data. Fleet management can significantly relieve the burden and help to maintain an overview. But it doesn't always have to be a subject-specific software solution! With the flexible structure of the **Function Center**, the basic module of our **Service Board** in conjunction with the **Inventory** module, it is possible to structure and manage all relevant information as you need it.

Motor vehicle data such as chassis number, type class, etc. become manageable. Service providers such as the leasing partner or the workshops can be easily assigned to the vehicles.

Insurance information is available where you need it. All user data and papers are included by the fleet management.

Processes such as vehicle delivery or take-back can be defined. Checklists actively support the process. the web-based system based on Microsoft SharePoint online as part of Microsoft 365

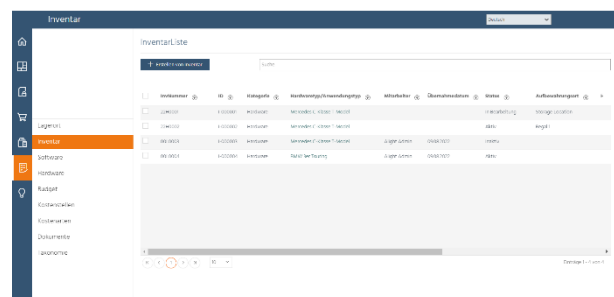

Figure 1: Vehicle list

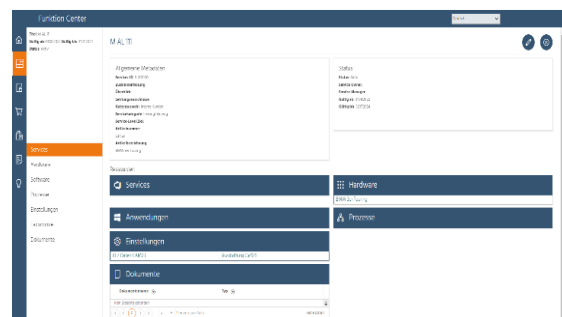

Figure 2: Detailed view of a vehicle

You can also manage documents such as:

- Vehicle registration document and registration document
- Insurance policy
- Lease contract
- Driving licences
- Passenger transport certificate
- Gefahrgutschein
- TÜV / HU protocols,
- ....

And if something happens, the incident with the vehicle can be documented in the damage file (accident report, photos, protocols...). Over the entire service life of the vehicle, everything is combined with the vehicle. Of course, all other Office products are integrated and can be used! Fleet management gives them the necessary functional flexibility in all respects. The weaving capability the mobility. At the desk as well as on the company premises. The implementation for the cost-neutral use of the functionalities of the fleet management is described in detail in the user manual!

We will be happy to inform you and show you the possibilities that can be used cost-neutrally in addition to fleet management with the **Function Center** and **Inventory** modules . Of course, we are also happy to provide you with our **business solution for Microsoft SharePoint online or Microsoft 365** for all other modules. Talk to us:
